

Adobe Illustrator Fundamentals for Beginners - Labs

Course code: C037 Version: v1 | 4 October 2026

Each lab is self-contained. Open its folder, read the guide, and work only on the supplied Illustrator/vector assets. Save all outputs inside the same lab folder or your trainer-approved workspace.

Lab sequence

1. [Lab 01 - Workspace, Artboards and Selection](#) - Set up a reliable vector workspace and distinguish object, group and anchor-level selection.
2. [Lab 02 - Shapes, Lines and Transform Systems](#) - Construct a precise icon set from live shapes and numeric transforms.
3. [Lab 03 - Colour Systems, Swatches and Strokes](#) - Create screen and print colour variants with a controlled stroke language.
4. [Lab 04 - Layers, Groups and Alignment](#) - Reorganise a complex document so stacking, grouping and alignment are clear and auditable.
5. [Lab 05 - Pathfinder, Shape Builder and Masks](#) - Compare construction methods and select the most editable result for a badge system.
6. [Lab 06 - Pen, Curvature, Pencil and Brushes](#) - Create controlled and expressive paths while keeping anchor economy and brush behaviour visible.
7. [Lab 07 - Gradients, Patterns and Symbols](#) - Build reusable colour and repetition systems, then improve one option through controlled experimentation.
8. [Lab 08 - Appearance, Graphic Styles and Typography](#) - Design a typographic poster with live type and reusable appearance treatments.
9. [Lab 09 - Image Trace, Artboards and Export](#) - Convert suitable raster artwork, clean the vector result and deliver a verified multi-artboard asset set.
10. [Lab 10 - Brand System Capstone, Handoff and Peer Review](#) - Integrate the course workflow into a coherent vector brand kit, evaluate it and prepare a rights-aware handoff.
