

Lab 02 - Shapes, Lines and Transform Systems

Course: Adobe Illustrator Fundamentals for Beginners (C037) Version: v1 | 4 October 2026

Scenario

Create three related wayfinding icons that must remain consistent across print and screen sizes.

Objective

Construct a precise icon set from live shapes and numeric transforms.

Supplied Illustrator/vector files

- shapesLines.ai
- transformEach.ai
- transforms.ai

Detailed procedure

1. Open shapesLines.ai and save Lab02-Shape-System.ai.
2. Build three icons with rectangles, ellipses, polygons, stars and line segments.
3. Use numeric position, size and rotation values for at least one repeated element.
4. Align and distribute the icons on a shared spacing system.
5. Duplicate one icon and use Transform Each or a reflected copy to create a controlled variant.
6. Inspect at small and large size, correct inconsistent proportions and export SVG and PDF proofs.

Evidence to retain

Editable AI master, three icon variants, SVG exports and a one-page PDF comparison.

Acceptance criteria

- [] Live shapes remain editable where practical.
- [] Spacing and alignment are consistent.
- [] Strokes scale intentionally.
- [] SVG and PDF exports match the master.

Reflection prompts

- Which decision most improved the message or focal hierarchy?
- How does the Layers or Appearance panel prove that your technique remains editable?
- What rights or provenance evidence must accompany the finished image?
